PolyNome Pro User Quotes

"I don't travel anywhere without it; unless I lose my phone!!"

Virgil Donati (Steve Vai, Planet X, Allan Holdsworth)

"This is the ultimate! Totally usable by any musician, not just drummers.. brilliant! Thank you, thank you."

Bob Franceschini, tenor saxophone (Mike Stern, The Yellowjackets)

"It's the s#!t! !"

Dennis Chambers (Santana, Steely Dan, John Scofield, etc)

"Polynome is great for teaching, practicing and rehearsing. Tempo input by way of the number pad is a terrific feature, and the subdivision possibilities are endless. Plus, this is the only metronome I've used that you can actually LEARN from. Simple and brilliant: simply brilliant."

Peter Erskine (Steely Dan, Weather Report, Steps Ahead, Kate Bush)

"Wow! Polynome is a brilliant tool for drummers and any musician! It allows you to understand precisely what subdivisions among bars of time feel like, teaches you the drum rudiments, and so much more. One of the best apps for your toolkit, right up there with a good tuner!"

Will Lee - session bass legend (Late Show, Brecker Bros, Bette Midler, ...)

PolyNome 5 Star App Store Reviews

"It might sound hyperbolic to say about a metronome, but this metronome is visionary. Smart devices have brought in a new age in metronomes, and many metronomes now offer polyrhythmic capability, step up training, random drop out clicks to work on your timing, playlists, etc. PolyNome has all these features and more. It even has a mixer with panning! One feature I love is that you can email your complex clicks to other people that have the app. This is great for working on rhythm training with students. PolyNome operates according to a somewhat different vision of metronomes than most.."

Aarondo

"Polynome (Pro version) is by far the best metronome app I have ever used in seven years of metronome apps. It is so deep and powerful, and the built in video tutorials by Joe really help show and explain the features, in a concise and simple way. And he is always improving it and listening to users' feedback. If you ever wanted an app that can do anything you can think of, this is it."

Fred George

"Complex metronome and full featured practice tool. This is the best I've seen."
